
Phillips-Medisize Showcases Connected Drug Delivery Devices at InnoPack

Hudson, WI – October 19, 2017 – Phillips-Medisize, LLC will present solutions for development and manufacture of drug delivery devices and primary pharmaceutical packaging, with a particular focus on connected health solutions where devices, connected services and drugs are completely integrated.

The continuum of Phillips-Medisize contract services featured include device strategy, product development, clinical and commercial manufacturing across specialty drug delivery devices, dosing systems, disposable insulin pens, inhalation devices, multi-component dosing units, spray applicators, as well as wearable drug delivery devices designed to improve patient engagement and drive better outcomes.

The use of electronic functional components is becoming a new prerequisite to facilitate the patients' drug administration, ensure precise dosing quantity and timing, and predominantly raise drug delivery to the highest safety standards. The rise in complexity of a drug delivery device results in exponential growth of important factors which must be considered when following the individual steps of the entire value-creation chain. Customers, prospects, and other interested parties can learn about the values and benefits of choosing a trusted outsource partner and will be informed how Phillips-Medisize can help to make an idea of a complex drug delivery device a successful commercial product. Further, as part of Molex, Phillips-Medisize is now able to provide turn-key manufacturing solutions for customers developing electro-mechanical and connected health drug delivery systems.

For more information about Phillips-Medisize connected health solutions visit booth 42D32 at InnoPack.

About Phillips-Medisize:

Phillips-Medisize, LLC, a Molex company, is a leading global outsource provider of design and manufacturing services to the drug delivery, consumable diagnostics, medical device, and specialty commercial markets. Backed by the combined global resources of Molex and its parent company Koch Industries, Phillips-Medisize's core advantage to customers is the knowledge of its people to integrate design, molding, and automation, providing innovative, high-quality manufacturing solutions.
